

Monitor and control lights, security, audio, temperatures, and webcams on PDAs and Smartphones when using an HAI home control system.

FEATURES

Conveniently control individual lights, turn off all lights in the home or room, dim lights or adjust preset lighting scenes.

View real time video of surveillance cameras: see your front door, nursery, pool, boat dock, etc.*

Conserve energy by adjusting heating and cooling and view humidity and outdoor temperatures.

Arm or disarm the alarm, view a security log to monitor activity of housekeepers, nannies, etc.

Control your Whole Home Audio system. Select music source and adjust volume levels in individual rooms or the whole house.

Notifications	Optional popup notifications (audible and visual)
Operating systems	Windows® Mobile 5.0 and higher and .NET compact framework 2.0

Snap-Link Mobile is designed to connect Touchscreen, navigation key, or scroll wheel equipped mobile devices directly to the HAI home control system through a secure AES encrypted connection. Snap-Link Mobile downloads directly to a mobile device and is secure over both Wi-Fi and cellular data networks.

Users receive a registration card that includes a serial number and URL to register and download the Snap-Link Mobile. This license will allow Snap-Link Mobile to be installed on one device at any time.

There are no subscription fees and users receive updates for free. Snap-Link Mobile does not rely on third parties other than cellular service to operate.

*Requires appropriate cellular provider plan and cameras. Snap-Link Mobile requires a device running any version Windows® Mobile 5 or 6 and .NET Compact Framework 2.0+. Not compatible with Windows Mobile 7.0 and above.
