

# HAI OmniTouch<sup>PRO</sup>

TOUCHSCREEN SOFTWARE

HAI OmniTouchPro is an intuitive touchscreen interface application for a PC or PC touchscreen that provides access to security, lighting, temperature, audio/video, cameras, and much more. The included default interface design can display in various resolutions and eight different languages.

## FEATURES

- HTX compatible

---

- Various resolutions available (4:3 ratio only)

---

- Eight languages available

---

- Interface populates based on Omni controller's PC Access file

---

- Allows third-party touchscreens to operate HAI systems

---

- Works with HAI Automation Studio, or as standalone

**EXAMPLE THIRD-PARTY TOUCHSCREEN - NOT INCLUDED**

**Use HAI Automation Studio software to add particular hardware to the system or modify the appearance of the Touchscreen graphic interface.**

## SYSTEM REQUIREMENTS

- 500 megahertz (MHz) processor (AMD Geode LX800 or Intel Atom Z530 equivalent, or higher)

---

- Microsoft Windows XP, Vista, or Win7

---

- .NET Framework 2.0 or higher

---

- 512MB RAM

---

- 2GB disk space

---

- Wired or wireless network adapter

---

- Internet connection (for software updating)

---

- Integrated audio/audio card and speakers (for sounds)

Upon purchase of OmniTouchPro, languages and available resolutions are downloadable from [www.homeauto.com](http://www.homeauto.com). The standard interface can be customized using HAI Automation Studio software (part number 1126) for a more unique install. Automation Studio is required to set up surveillance cameras that you wish to view on your third-party Touchscreen, and to configure HAI's HAI Home Theater Extender (HTX). However, you can add up to two HAI Camera Servers (for eight surveillance cameras) without Automation Studio.

Set up one button on a Touchscreen to close the curtains/shades, lower a screen, and turn on the appropriate A/V equipment. When an HAI home control system is added, you gain control of the room's lighting, temperatures, and more.

HAI OmniTouchPro is intended for use to customize an HAI system and should be used by installing dealers only. HAI will not provide technical support for third-party tablets or Touchscreens.
