

Data Sheet

SRC2

Advanced System Remote Control with Learning Capability

The SRC2 infrared remote control is designed to operate Russound multiroom systems with up to eight connected audio-video sources. It also will control up to three local devices such as a TV or home theater receiver.

To support local device control, the SRC2 has an extensive library of IR codes for most manufacturers' products. It also has command learning capability for other devices and unique functions.

For easy viewing in dark rooms, the SRC2 features backlit keys. Two preset keys allow direct selection of favorite programs when used with a CAM or CAV system. Page Up and Page Down keys in addition to standard cursor keys support on-screen menu navigation. A Disc key enables direct selection of a disc in a multidisc CD or DVD changer. Discrete source keys allow selection of sources on the Russound system without scrolling through a source list.

The SRC2 comes in a silver finish and employs a sleek ergonomic design with widely spaced keys for comfort and ease of use. The back side has a rubberized coating for a secure grip and a softer feel.

The SRC2 works with Russound's CAA, CAM, and CAV multiroom systems, as well as with the SaphIR K2 keypad.

Specifications

Systems supported: CAA66, CAM6.6, CAV6.6, SaphIR K2 keypad

Sources supported: 8 total (number of sources limited by system)

Local devices supported: 3

Learning capacity: 40–100 commands
